Viel Erfolg!

Ihr ZPID-Team
Thank you for participating in this survey. In the subsequent part of the questionnaire you will find questions concerning customs and habits in your native country/country of residence. We would like to know your opinion as to how common or frequent certain ways of social behavior are in your native country/country of residence.

Please read each of the following items carefully and estimate the frequency of these ways of social behavior in your native country/country of residence by marking the relevant number on the respective scale with a cross. If you think that the behavior mentioned does not occur at all in your native country/country of residence please circle 1. To indicate that the behavior mentioned is very frequent in your native country/country of residence please circle 7. To make it easier for you to answer the questions, the meaning of each scale value has been written below the relevant number.

Please answer as spontaneously as possible. There are no correct or wrong answers, we are only interested in your personal opinion. It is not necessary to write down your name; your answers, which will be anonymously evaluated, are only used for scientific purposes.

In the following part of the questionnaire we would like to know how you assess certain ways of social behavior. The questions are similar but not identical to those of the first part.

Please read each of the following items carefully and indicate the degree of your approval or disapproval by marking the relevant number on the respective scale with a cross. If you think that the behavior mentioned is very bad please circle 1. To indicate that the behavior mentioned is very good please circle 7. To make it easier for you to answer the questions, the meaning of each scale value has been written below the relevant number.

Please answer as spontaneously as possible and according to your own opinion. There are no correct or wrong answers, we are only interested in your personal opinion. It is not necessary to write down your name; your answers, which will be anonymously evaluated, are only used for scientific purposes.
